STUDENT TEACHERS LEARNING METHODS & REPORTS

Learning report

What is the Learner Doctor Method?

The Learner Doctor method of clinical training is a learning Program that is part of clinical rotations of the MBBS course that is designed to provide medical students a longitudinal immersive learning experience in the care of patients in a supervised setting.

Goals

The Goals of the Learner Doctor program are to provide students experience with longitudinal patient care functioning as part of the Health Care team

“Hands on” care of patients in the inpatient and outpatient settings.

STRUCTURE

Student is assigned to medical wards surgical pediatric, obgyn ortho units during clinical rotation	Students get oriented to hospital atmosphere & is guided for patient approach taking care of all ethics	Students are guided for better patient doctor relationship	Students are taught to work & a team work
---	---	--	---

Students are taught history taking & clinical examination in phase 1.
In phase 2 all of the above they are directed towards communicating with the Patient seeing the investigations & discussing treatment .
Phase 3 all of the above & they are directed towards patient care & counseling

Students are taught about communication skills with patients & patients relatives

Linking Learning to activity in the learner doctor program

Learning planned	Activity
Data gathering arranging in a meaningful fashion as integral to patient care	Obtaining detailed history and physical and documentation in the case sheet or shadow case sheet in the prescribed format
Critical thinking and analysis	Recording analysis of the patients problem and arriving at a likely diagnosis from a list of differential diagnosis
Decision making Cost effectiveness Care of the patient	Developing a management plan, choosing and ordering and interpreting appropriate laboratory and imaging tests
Decision making System based practice	Choosing appropriate therapy Writing a prescription review and reconciliation of medications Use of electronic medical record
Communication	Discuss the diagnosis and treatment plan with Patient
Team work	Participate in patient rounds and team activities
Team work	Participate in multidisciplinary rounds with nutrition nursing etc
Clinical skills Team work	Participation in ward based and OT based Procedures
System based practice	Chart review and participation in quality initiatives in patient care
Observe minor & major surgeries	If possible assist in surgery
Observe minimal invasive surgery	If possible be a member of the team assisting

Self Directed learning Skills for lifelong learning	Reviewing the literature based on the patient's problems and presenting that information to support decisions made in the care of the patient
Skill lab training for procedures Basic wound care ,basic bandaging , basic suturing ,incision&drainage , ATLS	Should be confident to do individually

Caveats for the supervising physician

We Brief students clearly expectations roles about the limits of autonomy in patient contact Follow institutional policy with regards to access to and documentation in patient records Introduce students to the patient and obtain permission from the patient for the student to examine and be involved in the care Respect patient wishes if they do not want to a student doctor to be part of their care .

We Ensure that students perform activities on patients only for which they are certified to perform independently or under supervision (do not use this program in lieu of the skills lab)

We ensure that the security of patient & students is an utmost priority. Respect time that is allotted do not ask students to miss their pre-scheduled classes for patient related work In the event of a doubt follow the hospital's rules and regulations always

Program Evaluation

We use Feedback from all stakeholders to improve the program at the institution level. Faculty is provided with an anonyms copy of the feedback from students to help improve their performance. Feedback may be requested by the NMC periodically through the nodal centres for program improvement and course corrections as required we evaluate our students by assessments by term ending exams , osce , clinical viva. We have formative &summative assessments students have log book.
